

International Conference

“Improving City Food Security and Creating Work Through Urban Farming Based on Culture and Technology”

Bandung, 3 - 4 August 2022

Overview

The forum will **focus** on overcoming existing **inequalities** in accessing food, obtaining greater food security, and boosting job creation. More specifically, this event will support the themes of “**Green Job**” and “**Smart City**” which are important concerns for the **Urban-20**, which is currently coordinated by Indonesia with its **G20** presidency. **Bandung** will host the event as member of the Steering Committee for Asia Pacific of the **Milan Urban Food Policy Pact (MUFPP)**.

Through the forum, the MUFPP – which is the first and foremost network of cities devoted to food system transformation – aims at spurring Asia Pacific cities and their leaders to release their potential to improve urban food systems and making their voices heard in the global arena. The **European Union (EU)** supports the MUFPP within the **Farm to Fork Strategy** - which is at the heart of the **European Green Deal** - aiming to make food systems fair, healthy and environmentally friendly. The City of Milan is an active member of the EU-funded “International Urban and Regional Cooperation” programme (**IURC**), which supports city-to-city cooperation between EU and non-EU cities. Since March 2022, the MUFPP and IURC have organised a **training series** on urban food policy for cities in Asia Pacific, which build a good base for discussions at the Bandung forum.

The **two-day event** will consist of two activities: during Day 1, the international conference will offer the chance to discuss challenges and solutions to urban food systems from cities in Indonesia, the Asia Pacific Region and the European Union. On Day 2, field visits will inspire participants with tangible solutions from Bandung, the first Indonesian city that signed the MUFPP in 2020.

Background

Over the years, food has been recognised by the international community as one of the most pressing issues of our time, closely linked to an increased urban development. It is not by chance, that the first two SDGs – SDG1 No poverty, SDG2 Zero Hunger – are deeply connected to food.

This is a cross-cutting issue, intertwined with several aspects of sustainable development. In this context, **mayors play a fundamental role** as they manage several levers of the food system in their cities, thus potentially contributing to the achievement of the **Sustainable Development Goals**.

Across the continents, cities committed to healthy, sustainable and inclusive food systems have a lot in common. They share enormous challenges as well as responsibilities. Thus, providing cities with the autonomy and funding to support local food systems has a huge potential worldwide.

Among the different aspects of the food system that mayors can address, **food security** is surely one of the most prominent, even more after the pandemics.

Supported by

Data reported by the World Food Programme and the Embrace Relief Agency are disconcerting: we live in a world where 957 million people do not meet the most basic food needs. Especially regarding children, this condition results in a weak physical condition and decreased mental function. In other words, there is still **high inequality in access to food** in various regions of the world.

Food systems are an important topic also for the **European Union**. The *Farm to Fork Strategy* is the policy framework to redesign our food systems, which today account for nearly one-third of global GHG emissions, consume large amounts of natural resources, result in biodiversity loss and negative health impacts (due to both under- and over-nutrition) and do not allow fair economic returns and livelihoods for all actors, in particular for primary producers. Putting food systems on a sustainable path also brings new opportunities for operators in the **food value chain**. New technologies and scientific discoveries, combined with increasing public awareness and demand for sustainable food, will benefit all stakeholders. The international dimension of the EU's *Farm to Fork Strategy* is reflected in several dialogues taking place in non-EU countries in 2022.

Therefore, moving from the **Urban-20** objective to strive for a more equitable, sustainable and resilient future, the **1st MUFPP Asia Pacific Regional Forum** will stand as a unique opportunity to advocate the importance of improving access to food and building more sustainable and just food systems. In order to accomplish this goal, there is a need to collaboratively work to ensure that these themes will be included in the political agenda of cities, governments and international organisations.

Objectives:

The forum aims at:

1. Raising awareness on inequality in access to healthy food.
2. Spurring Asia Pacific cities and their leaders to drive the change in improving food security.
3. Promoting city-to-city cooperation on urban food leading to concrete pilot actions.
4. Shaping and developing innovative urban farming projects, creating jobs for young generations.
5. Addressing U20 leaders through the Governor of West Java on the outcomes and main take-aways of the Forum.

Programme

DAY 1 – 3 AUGUST

UNPAR University

TIME	SESSION	SPEAKERS
08:00 - 9:00	Registration	
09:00 - 11:15	Opening Ceremony	Welcoming remarks from Dr. Pius Sugeng Prasetyo (Organization Committee), Mangadar Situmorang (Rector of Parahyangan Catholic University), Yana Mulyana (Mayor of Bandung), Anna Scavuzzo (Vice Mayor of Milan), Bima Arya Sugiarto (Mayor of Bogor and President of APEKSI), René Sieron (EU Delegation to Indonesia and Brunei Darussalam), Ridwan Kamil (Governor of West Java)
11:15 - 11:50	State of the Pact in Asia Pacific & Welcoming ceremony for new MUFPP cities	Filippo Gavazzeni (MUFPP Secretariat)
11:50 – 12:35	Roundtable of international experts	Chris Claes & Nonie Kaban (Rikolto), Jacqueline Chang (IURC Asia & Australasia), Ir. Anang Noegroho Setyo Moeljono (Food And Agriculture Ministry of National Development Planning Republic of Indonesia)
12:35 – 13:35		Lunch break
13:35 – 15:00	Sharing Session: Best Practices on Food Production (MUFPP & IURC Asia Pacific Food Policy Training on Food Production)	Andrea Magarini (City of Milan); Gin Gin Ginanjar (City of Bandung); Ir. Ahyani (City of Surakarta); Chew Eng Seng (City of Seberang Perai), Jeong Jin-Sook (Seoul Metropolitan Government)
15:00 – 16:35	Parallel sessions	
	* Topic 1: Strengthening common awareness on the issue of inequality in access to healthy food	Moderated by Nonie Kaban (Rikolto)
	* Topic 2: Encouraging the young generation to be involved in achieving urban food security (including how to create more job in urban system area)	Moderated by Rhyma Permatasari (Komunitas Cinta Alam Indonesia - CAI)
	* Topic 3: Strengthening networks and collaborations both nationally and internationally in realizing a <i>Food Smart City</i>	Moderated by Dini Laraswati (IURC Asia & Australasia)
16:35 - 17:15	Closing session	

DAY 2 – 4 AUGUST

Pick up point: Balai City Hall Park (upon registration)

TIME	ACTIVITY
08:00 - 9:00	Preparation to Field Visit
09:00 - 12:00	Field Visit - Buruan SAE
12:00 – 13:00	Lunch break
13:00 – 15:00	Buruan Sae Display
15:00 – 18:00	Mural Activity / City Tour
18:00 – 19:00	Closing

Field visits – Buruan Sae Programme

During the second day, participants will have the possibility to experience first-hand Bandung's activities on urban farming. Indeed, Bandung as many other cities in the region has been contributing to taking steps to overcome the issue of food access. The most important achievement has been the creation of a culture-based urban farming called **Buruan Sae** (Sundanese: good garden – Healthy, Natural, Economical).

This movement is mostly carried out by communities in the city, which currently has more than 300 spots spread across all urban villages. The city wants to push even further this great project, by raising awareness on the younger generations. Indeed, the involvement of youth in urban farming plays a central role in promoting the city's food security, while creating new jobs.

HOW TO GET TO BANDUNG

After arriving in Jakarta, it is suggested to use land transportation to Bandung.

This will take about 3 hours.

Travel car options:

- citi trans from Bandara Soekarno-Hatta International Airport to Bandung via pasteur/ cihampelas/ dipati ukur. (Rate Rp 200.000 / person)
- lintas shuttle from Bandara Soekarno-Hatta International Airport to Bandung (rate Rp 160.000)
- x trans from Bandara Soekarno-Hatta International Airport to Bandung (rate Rp 140.000)

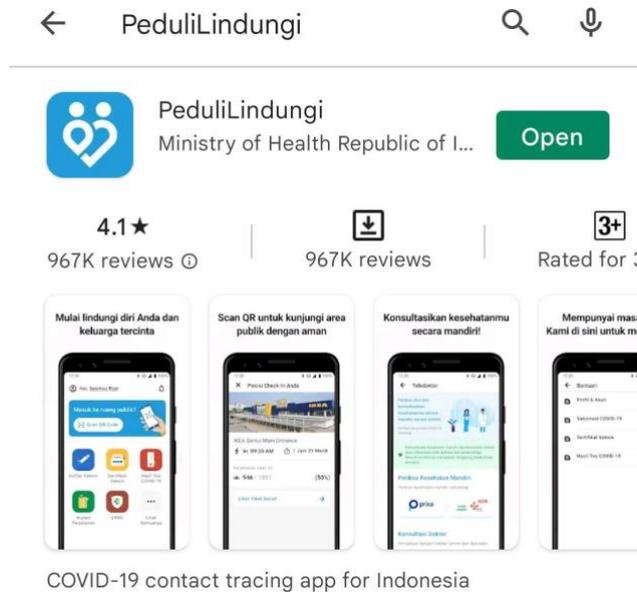

To use public transport, you need to have **PeduliLindungi** App.

How To Download

1. Open PlayStore (Android) or AppStore (iOS), search for PeduliLindungi and download
2. After the application is installed, go to PeduliLindungi to complete the user profile

Supported by

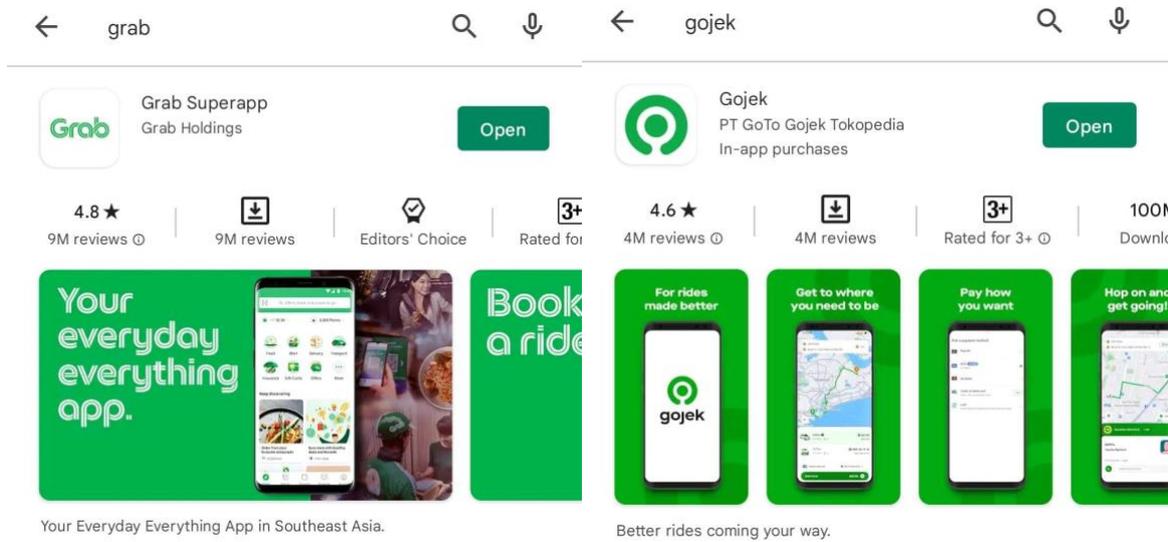

Complete Personal Data

1. For Foreigners, select “Foreigner/Warga Negara Asing” and the language you want to use
2. Create an account or log in with a registered account
3. Enter the Verification Code (OTP) sent via e-mail
4. Allow PeduliLindungi to access your device's location, media and camera
5. Complete your profile in PeduliLindungi

We suggest the applications **Go-Jek** or **Grab** to travel around Bandung

How To Download and Register

1. Open PlayStore (Android) or AppStore (iOS), search for Go-Jek or Grab and download
2. After the application is installed, go to Go-Jek or Grab to complete the user profile
3. Click “register” (if your number is already registered simply click “log in”)
4. Fill in the required data correctly, then click “ continue”
5. Enter the OTP code that you receive via SMS
6. Done!

How to use **Gojek**

- Open the Gojek application and select the GoRide menu.
- The next step is to enter the location or address that is your destination.
- The pick-up location will be automatically detected, but make sure the detected location matches your location.
- After entering the pick-up and delivery location, the price page will appear. You can choose to use GoPay or cash.
- The driver order screen will appear and wait until you get the driver. After getting the driver, you can start contacting your driver with in-app chat or directly call the driver.

How to use **Grab**

- Open the Grab application and select the Car/ Bike menu.
- The next step is to enter the location or address that is your destination.
- The pick-up location will be automatically detected, but make sure the detected location matches your location.
- After entering the pick-up and delivery location, the price page will appear. You can choose to use ovo pay or cash.
- The driver order screen will appear and wait until you get the driver. After getting the driver, you can start contacting your driver with in-app chat or directly call the driver
